Remote Transmitter for Motorized Awning
Replacement Procedure

This procedure describes the actions needed to establish communication between the Motorized Awning and a replacement for the original or primary Remote Transmitter. This procedure should only be performed if the original or primary Remote Transmitter is being replaced.

Please review the steps below to familiarize yourself with the procedure before attempting to complete them.

1. Verify that the red LED light on the Remote Transmitter comes on when you press and hold one of the buttons marked with an UP arrow, a DOWN arrow, or the word “my.” If the red light does not come on at all or blinks for less than five seconds, you will need to replace the battery with a new battery (3V Lithium CR2430).

2. Unplug the Awning from the electrical outlet.

3. Insert the Wand into the Override Crank on the Motor and manually open the Awning approximately three (3) feet, but do not completely open the Awning.

4. Plug the Awning back into the electrical outlet. Let stand for one full minute. Do not press any buttons.

5. Disconnect the power cord (120V AC) for two seconds.

6. Reconnect the power cord for 10 seconds.

7. Disconnect the power cord for another two seconds.

8. Reconnect the power cord.

9. The motor should start to move and then stop on its own (if this does not happen, continue to perform the disconnects until it does or call for Technical Support).

10. Press and hold the Program button (may take a few seconds) on the back of the Remote Transmitter until the Motor jogs back and forth one time.

   For the Sunea motor (round silver end plate on motor) with electronic stops, skip to step 13.

   For the RTS motor (square black end plate on motor) with mechanical stops, continue with step 11.

11. Press and hold the UP and DOWN arrows together, until the awning moves.

12. Press the Program button on the back of the Remote Transmitter until the awning moves.

13. The Motor has now been reset to communicate with this Remote Transmitter. Please test the Motorized Awning for proper operation.

For Add or Delete an additional Remote Transmitter to control your Motorized Awning, please see “To Add or Delete Another Device” in the “Motorized Awning Owner’s Manual and Installation Instructions.”
